

PORK

A Pillar of the U.S. Economy

The U.S. pork industry is a significant contributor to the agricultural economy and a major contributor to the overall U.S. economy. As the most consumed meat in the world, the combined economic contribution from hog production and pork processing supports more than \$178 billion of direct, indirect, and induced sales, 613,000+ jobs, and \$57 billion in value added (GDP).

INPUTS & FARMING

The U.S. pork industry generates significant activity up and down its supply chain supported by more than 66,000 pig farms across the U.S.

1.6 billion bushels of corn valued at \$7.72 billion (10.8% of U.S. corn crop)

10.5 million tons of soybean meal representing \$3.39 billion in value (9.8% of the U.S. soybean crop)

More than 36,000 full-time farmworkers and management earning \$2.3 billion in wages

Additional industry services including grain elevators, insurance, real estate, transportation, and more

The pork industry supports thousands of related, community-based businesses

More than 138,000 harvest and processing jobs generate nearly \$7 billion in personal income

Combined with hog production, harvest and processing activity generates \$86 billion in direct sales

HARVEST & PROCESSING

Having produced 27.7 billion pounds of pork and helping contribute nearly \$14 billion in gross domestic production in 2021, this sector is the critical link to markets and exports.

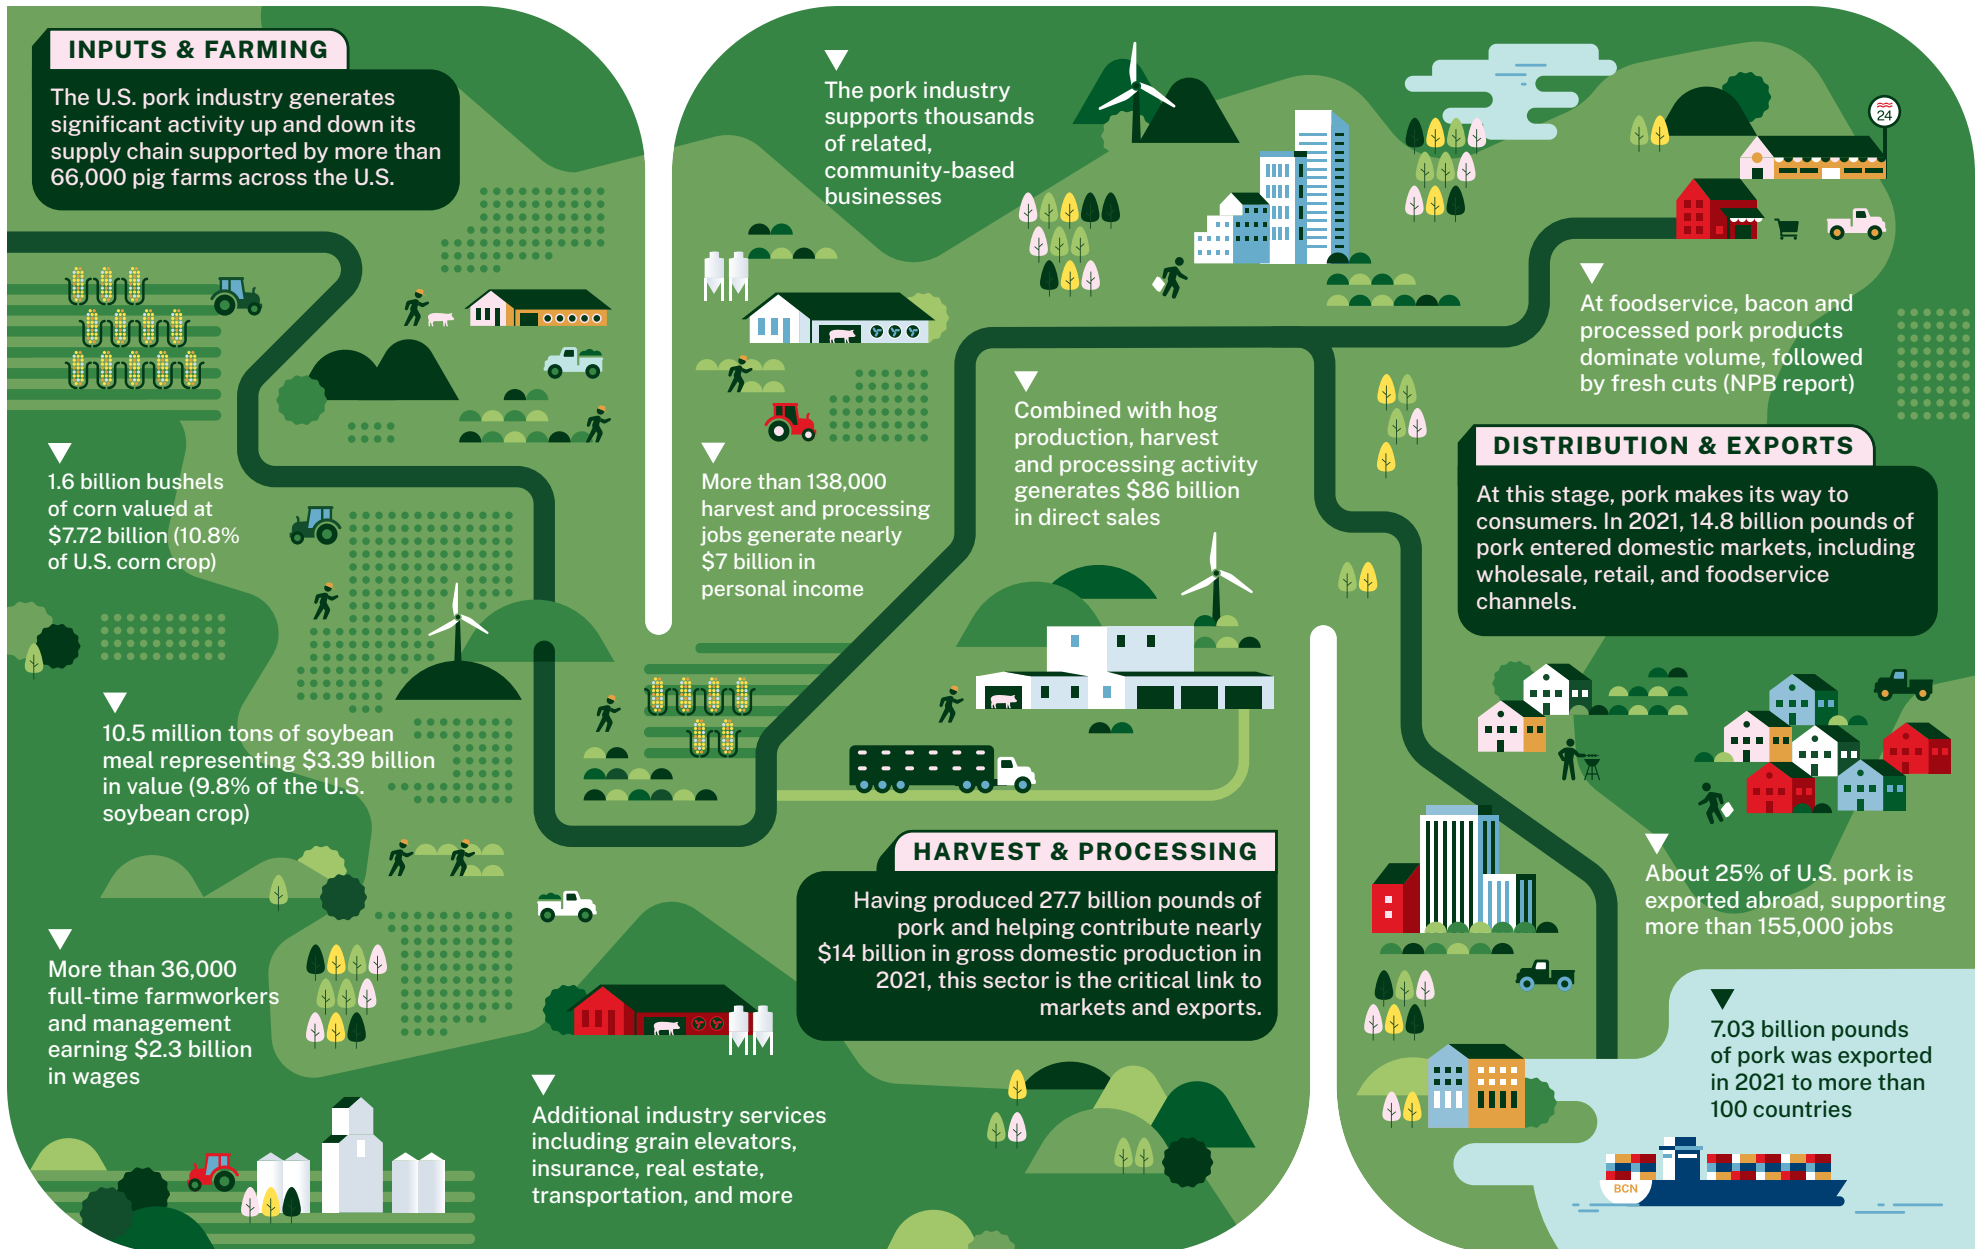

At foodservice, bacon and processed pork products dominate volume, followed by fresh cuts (NPB report)

DISTRIBUTION & EXPORTS

At this stage, pork makes its way to consumers. In 2021, 14.8 billion pounds of pork entered domestic markets, including wholesale, retail, and foodservice channels.

About 25% of U.S. pork is exported abroad, supporting more than 155,000 jobs

7.03 billion pounds of pork was exported in 2021 to more than 100 countries
